

Our Cut Flower and Decorative Department

Conducted at 5th Avenue and 37th Street, New York City, is the most complete establishment in its line in the United States.

FOR nearly 30 years we have carried on a first-class floral establishment, during which time we have furnished floral decorations for many notable events, supplying our patrons (who are, for the greater part, of the old New York families, and customers of long standing) with the choicest and best, which through years of experience and constant study of the art of horticulture we have been successful in producing. As our connection with the Rose Hill Nurseries gives us unusual facilities for such floral productions, our work in this line cannot be surpassed in the metropolis. Our stock of all the choicest varieties of plants for the production of cut flowers, together with our immense collections of rare plants, Palms, Cycads, Tree Ferns and Orchids, enables us to carry out orders of any magnitude with the greatest ease and with more satisfaction to our friends than can be given by those lacking the facilities. Orders by mail or wire receive prompt consideration.

FLOWERS DELIVERED BY TELEGRAPH TO ANY PART OF THE WORLD.

Being members of the Florists' International Telegraph Delivery Association, we are constantly delivering flowers on order anywhere. Our customer in New York or elsewhere can have any floral work, through us, delivered to his order and with his card in not only in every city of importance in the United States, but as well in London, Paris, Berlin or Vienna, at but a few hours' notice. This novel use of electrical cipher transmission is proving very satisfactory, and we invite the commands of our friends.

OUR PLANT-FURNISHING DEPARTMENT.

Some few years ago we introduced the Parisian plan of furnishing palms and decorative plants for conservatories, halls, drawing and dining rooms, etc., by the week, month or season, and it has worked with unparalleled success. Of course, with our great stock of palms and decorative plants, which is of such magnitude that it must be seen in order to be appreciated, we are enabled to supply any demand, and at the most reasonable prices.

We are always prepared to furnish plans, estimates and specifications for any floral work.

SIEBRECHT & SON'S NEW CANNAS = = ROSE HILL TRIO.

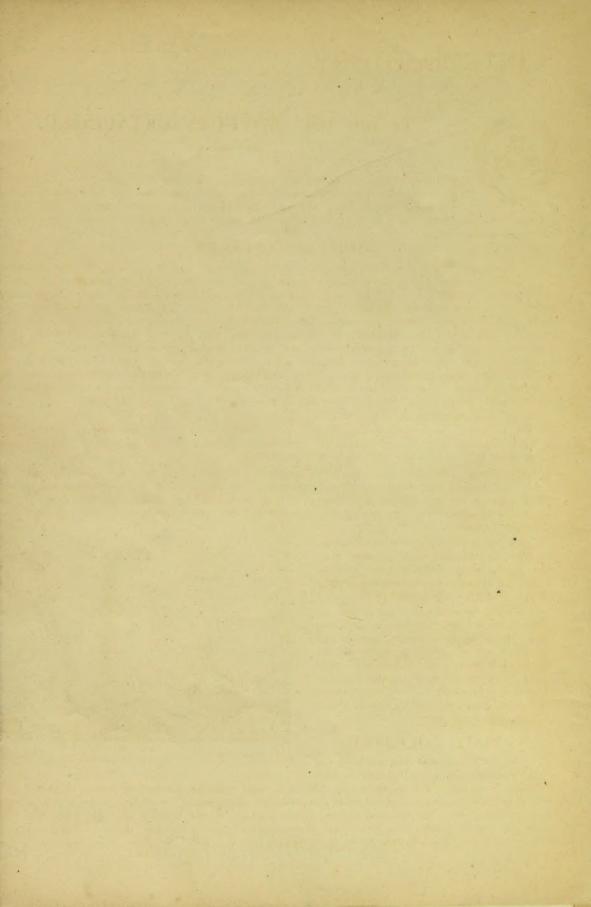

Rose Hill Nurseries, New Rochelle, N.Y.

PRINTED BY THE PHOTO-COLORTYPE CO., N. Y. FOR A. T. DE LA MARE PTG. & PUB. CO LIMITED, N. Y.

Copyright, 1897, by Siebrecht & Son, New York.

REDUCED TO LESS THAN ONE-HALF NATURAL SIZE.

INTRODUCTORY

To our 1897 NOVELTY CATALOGUE.

N PRESENTING this, our Novelty Catalogue, we wish to call attention to the variety and extent of our stock, as well as to its superior condition. We have added to our collection very many new and valuable plants of recent discovery and introduction,

and offer only such new plants as have been tried with satisfactory results, and which we can safely recommend to our clients.

OUR ADVANTAGES.

In addition to our large and well known Rose Hill Nurseries, at New Rochelle, N. Y., we are operating extensive Tropical Nurseries on our plantations in the West Indies, and are thus enabled to grow rapidly and to perfection, under the most favorable circumstances, many things which are slow and difficult of culture in North America. It is here that we raise the Palms and other decorative plants now so largely used in the best private dwellings to bring the charm of the tropics to our homes, as well as for the adornment of club houses, hotels and places of amusement on all festive occasions. No other spot in the world is so well adapted for the production of these plants in full beauty and vigor. The transportation facilities are now such that we can bring these plants to New York in perfect order. The fine shape, coloring and general good condition of such stock is always a subject of remark, and, being grown in so favorable a location, enables them to stand our climatic changes much better than if brought from the extreme tropics.

Our home establishment, the Rose Hill Nurseries, at New Rochelle, N. Y., is very extensive and well arranged. It includes a very large area of glass houses of the most approved modern construction, together with aquatic ponds and well located grounds for the growth of outdoor ornamental stock of every variety under favorable conditions.

Our direct connections with the most prominent botanical and commercial establishments of Europe, the East Indies, Australia and South America, are also a great advantage in procuring and exchanging rare and valuable stock; wherefore, it may be readily understood that we are in an exceptionally favorable way of meeting all demands for new, rare and valuable plants at the most reasonable prices.

We do not cater to a cheap trade, therefore we offer and send out only first-class, strong plants, which will give immediate results, always carrying out our motto: "GOOD VALUE FOR MONEY."

We ask especial attention to our department of Landscape Architecture, in which we are prepared to undertake work of any magnitude, and to our superior facilities for Decorative Work in plants and flowers. With nearly thirty (30) years of experience in supplying a critical metropolitan clientage, we are justified, we think, in claiming special ability to meet any demands.

A VISIT SOLICITED.

We invite personal inspection of the stock contained in our home Nurseries at New

Rose Hill, Nurseries-New Power House and Machine Shop.

Rochelle. Here are constantly to be seen many interesting sights not common to ordinary nurseries—rare Orchids and tropical plants in bloom, grand specimen Palms and Cycads, a profusion of the finest Roses, fine Aquatic Plants, etc. We are glad to see visitors any day except Sunday, and the Rose Hill Nurseries are easy of access from New York. Trains on the New York, New Haven and Hartford railroad, leaving the Grand Central depot (Forty-second street) every hour, also by the Suburban R. R.

at a quarter of the hour, from 129th street and 3d avenue, pass New Rochelle, and cabs and stages for the Nurseries will be found at the station on the arrival of all trains. We have telephone communication, also, with New York City, and with all parts of the country.

Rose Hill Nurseries-Delivery Wagons in foreground.

Conditions under which we Conduct our Business.

1. The prices given in this Catalogue are for well-grown and well-developed plants of suitable shipping sizes; larger plants can nearly always be supplied at proportionate prices. No stock, however, is so small and weak as that supplied by many firms who make a specialty of the "mail" trade, and our plants are incomparably better than any so furnished; they are well worth paying expressage and freight on.

Rose Hill Nurseries-Our 1897 Palm addition, containing 42,000 square feet of glass.

- 2. All purchasers are requested, when ordering by mail or otherwise, to give their proper address, and directions where to and how they desire their orders shipped—whether by freight or express; if there is any choice of routes, name the one preferred. When not advised how to ship, we exercise our own judgment, and forward to the best advantage of the purchaser.
- 3. New customers and persons unknown to us are kindly requested to accompany their esteemed orders either with cash, post office orders or draft on New York, or with satisfactory references.

- 4. All orders are carefully packed for shipment by experienced hands, so that they can be sent even to far distant points with perfect safety; and no charges are made for packing and shipping by express or freight at New Rochelle. Our close proximity to New York City enables us to ship by any of the very many routes centering in the Metropolis.
- 5. Safe arrival assured. We guarantee the safe arrival of all plants sent by express. Should anything be injured in transit we would urge our customers to notify us at once on receipt of the goods, and in every case send us a list of what has been damaged, so that we can replace them without delay. But when they arrive in good condition our responsibility ceases, and if from inattention or other causes they fail and complaint is then made, we cannot replace them. Plants sent other than by express are entirely at the risk of the purchaser.

Rose Hill Nurseries-Interior of Packing House.

- 6. Shipping facilities via Adams Express Co., by which we receive 20 per cent discount; freight via New York, New Haven and Hartford Railroad direct to all points east and northeast; or via New Rochelle and New York Transportation Line, which transfers in New York to any express or freight lines.
 - 7. We will mail on application our General Descriptive Catalogue.

New Cannas for 1897.

SEE COLORED PLATE.

The Colored Plate of Cannas which accompanies this catalogue gives but a faint idea of the full beauty of the magnificent trio there shown, namely, Mrs. Fairman Rogers, Italia and Austria, it being very hard to do the subject full justice.

MRS. FAIRMAN ROGERS, an American Hybrid, and, without a doubt, the grandest Canna ever originated and placed on the market. It is a seedling of Mme. Crozy, but in every way superior to that famous variety. The individual petals are much larger, more rounded, of better texture, and the color is a brilliant scarlet, bordered with a pronounced broad band of gold. It is the finest flowering variety ever introduced, carrying immense spikes of dense bloom, which are showy beyond description, and as it stands exposure admirably in all weathers, it thus becomes the finest Canna procurable for bedding purposes. Mrs. Fairman Rogers is truly the Queen of Cannas. It has received medals and certificates wherever exhibited. We hold nearly the entire stock. (See colored plate.)

Price \$1.00 each; \$10.00 per dozen.

Orchid=Flowering Varieties.

ITALIA.—The individual petals are clear scarlet, deeply bordered with golden yellow, the illustrated plate herewith showing the distribution of the colors (See colored plate.) Price 75 cents each.

AUSTRIA.—Is of the clearest canary-yellow, with a few red specks in the throat, so faint that it is safe to call it a perfectly yellow Cana. (See colored plate.) Price 50 cents each.

Both of the above constitute a distinct break from existing forms, and though the improvement in Cannas has been most marked in recent years, none of the newer varieties are to be classed with the above for size of flowers and effectiveness of color, hence the title, "orchid-flowering." Single blooms have measured 5½ ins. across, and the average should exceed 4½ ins. The shading is the most gorgeous and exquisite imaginable. They do well in very poor soil, and stand a gale better than most sorts. As a cut flower for house use they have few equals. Each spike will average from seven to nine blooms.

The Rose Hill "Trio."

Read the greatest offer ever made to flower lovers in the history of floriculture:

MRS. FAIRMAN ROGERS,

The Queen of Cannas.

ITALIA and AUSTRIA,

The giant orchid-flowering varieties.

The set of three (3) strong plants, which will flower early in the season, for only \$2.00.

Orders Booked in Strict Rotation.

CANNAS-Of Grand Standing and Merit.

Our Selection of the finest Varieties:

- I. COLUTBIA. A gem among Cannas; an American seedling. It has an entirely distinct habit of growth, and the character of the flower is equally distinct; color, rich cardinal-red. It is a very strong grower, but very short and stocky, with abundant foliage. The most peculiar characteristic of the plant is its branching habit, sometimes having three or four trusses of bloom on the same spike, all open at the same time, producing a mass of bloom of an even height. The petals have remarkable substance, flowers remaining good for weeks at a time—wind and rain having little effect upon them, which is a long step forward in this direction. What is wanted in Cannas is flowers that have the ability to stand wind and rain, and that not are easily marred. 25 cts. each; \$2.50 per doz.
- II. QUEEN CHARLOTTE. This excellent variety has proved itself to be worthy of the reputation it held when sent out. Unquestionably a grand addition to the list of Cannas. The centre of the flower is bright scarlet, bordered with a deep band of pure gold, producing a distinct, novel, and beautiful effect. A dwarf grower. 25 cts. each; \$2.50 per doz.
- III. EGANDALE. Foliage dark maroon and green, very similar in coloring to the old Robusta Perfecta, although more erect in habit; very compact, throwing up numerous heads of bloom which rank with the best in quality, both in size of the heads and quality of the flower; color, bright cherry. It is undoubtedly the finest blooming dark-leaved sort at the present time for outdoor bedding. Bronze Medal awarded for this at World's Fair, Chicago, 1893. 25 cts. each; \$2.50 per doz.

CANNAS-Of Grand Standing and Merit-Continued.

- IV. CHARLES HENDERSON. A splendid, compact, dwarf grower, throwing up erect, compact heads of bloom of immense size. The individual flowers are among the very largest; color, dark crimson, centre of the flower marked with golden pencilings. This is one of the very handsomest varieties. 25 cts. each; \$2.50 per doz.
 - V. PAPA. M. Crozy claims this variety as his finest variety to date, and it certainly is a grand addition to the already gorgeous array of red Cannas. It grows about three feet high, and bears immense spikes of flowers, the florets being of the grandest size and finest form. In color, it is a brilliant orange-scarlet. A good many who have tested this variety extensively claim that it is one of the very finest, if not the finest red variety, but its claim to supremacy can only be determined by future tests. The new varieties that have been introduced lately are raising the standard very high. 35 cts. each; \$3.50 per doz.
- VI. ELDORADO. This variety is all that was claimed for it last year. It is by far the best yellow Canna that has yet been introduced; none of the others come near it. The flower is not a pure yellow, but so nearly so as to show no trace of any other color at a short distance. Upon close examination it is finely speckled with the lightest red, but this only seems to intensify the yellow a few feet away. The flowers do not fade as some yellows do. When past perfection they drop, making room for the others, leaving the plant always bright and clean. It throws up an immense spike of bloom, very compact, and blooms very freely. Petals are very broad and finely formed. Habit all that can be desired. At the Canna Show in New York this variety received a certificate of merit. 25 cts. each; \$2.50 per doz.
- VII. ALPHONSE BOUVIER. This variety is beyond all question the finest of the tall-growing crimson sorts. It is the tallest of all the varieties. Under good cultivation it grows from seven to eight feet high. The heads of bloom are of the largest size, and are very effective. Where a tall grower is desired, nothing surpasses this variety. Bronze Medal awarded for this at World's Fair, Chicago, 1893. 25 ets. each; \$2 50 per doz.
- VIII. MILLERII. A new and truly distinct variety, and the best yellow bedding Canna to date. In the way of Eldorado, but much superior. 30 cts. each; \$3.00 per doz.
- IX. MONUMENT DU CARNOT. Flower spikes rich crimson; of great size and substance. In the way of A. Bouvier, but with bronze foliage. 30 cts each; \$3.00 per doz.

The above collection comprises the cream of all the Cannas. We offer one each of these nine grand varieties, together with one each of the three greatest novelties for 1897: Ars. FAIRMAN ROGERS, and the giant orchid-flowering varieties ITALIA and AUSTRIA; the entire set of twelve (12) Cannas, all strong plants, of flowering size, which would cost \$4.70 if bought separately, for \$4.00.

JOHN WHITE-This is a distinct novelty in the way of Cannas, growing about three feet in height, with reddish stems, light green foliage, beautifully striped with white, yellow and rose, edged with red, the combination of which produces a grand effect, and on account of which it will be valuable for subtropical borders and beds, and for other purposes, where fine foliage plants are in demand. The flowers are small and of a bright red color, succeeded by red fruit which enhances its appearance. Ready now. Price, \$5.00 per dozen; \$35.00 per 100.

CANNAS-Old Varieties and Choice Sorts. Good for Bedding Purposes.

- CANNA Adolphe Weick. Very dwarf, compact habit, flowers rich crimson-scarlet, shaded orange; a plant, bearing immense flowers of cherry-crimfoliage rich pea-green.
 - Admiral Courbet. Flowers yellow, speckled and blotched orange-scarlet; green foliage.
 - Antoine Chantin. Height three feet; large, rich-colored foliage, beautiful green; large flowers with round petals, two of them touched with yellow; color a beautiful rosy salmon.
 - Antonin Crozy. A vigorous grower; foliage green; flowers bright rosy carmine.
 - Asa Gray. Dwarf, compact foliage; flower large, salmon-red.
 - Baronne Cosaneaut. Rich deep green foliage, bright orange-scarlet flowers; free flowering.
 - Cardinalis. Flowers rich orange-scarlet, foliage bright; dwarf.
 - Chevreul. Shining green leaves; centre of petals carmine, bordered clear yellow.
 - Chevalier Besson. Dark green foliage; flowers of a rich cerise-salmon shade.

- son color
 - Very dwarf, broad green leaf; flower Donato. round, clear rosy scarlet.
 - Edouard Andre. Dark foliage, shaded green; flowers deep lake, good.
 - Emile Leclerc. Golden-yellow, crimson and searlet; deep green foliage.
 - Epis d'Or. Foliage deep green, edged silver; long spikes of large golden buff-shaded flowers; fine.
 - Flamboyant. Crimson-lake, shaded orange; deep metallic green foliage.
 - Francois Corbin. Silvery green, lance-shaped leaves; flowers beautiful canary yellow, spotted
 - General Baron Berge. Dwarf; vigorous grower; foliage bright green; very free in bloom; flower extra large, bright scarlet.
 - Canary-yellow flowers, General Boulanger. mottled and streaked with crimson and scarlet.

CANNAS-Old Varieties and Choice Sorts-Continued.

CANNA Gerard Andre. Green foliage; flowers very large and fine, of a beautiful deep amber, shaded red; extra fine.

Henry Martin. Orange-scarlet; extra large flowers; foliage dark green.

Louis Thibaut. Flowers yellow, middle of the petals heavily spotted with red.

Maurice Rivoire. Extra fine; silvery-purple foliage; extra large round flowers; color rich purple; distinct and noteworthy in many ways.

Mme. Crozy. One of the most magnificent Cannas ever raised; a very vigorous dwarf grower, with bright green foliage; compact habit, and throws up quantities of flower stalks; the blooms are extra large, of bright vermilion-red, bordered with gold, and of beautiful Gladiolus form. \$1.

Mme. Oriol. Compact, vigorous grower; large round flower, of carmine-rose, passing to salmon.

CANNA Noutoni. Large flowers, very brilliant crimson; green foliage.

President Carnot. A strong grower, with upright foliage of fine, silky purple; very free in bloom; flower large and round; soft crimson, lined and pointed a lighter shade. \$2.00.

Secretaire Nicholas. Two to three feet; foliage upright and compact, bright, glaucous, silvery green; flower large and compactly built; color a magnificent blending of red shades

Star of 1891. Bright orange-scarlet, with faint bands of yellow; very dwarf and compact; a fine pot plant, as well as bedder.

Thos. S. Ware. Strong dwarf grower, leaves quite lanceolate; color rich, bright vermilion; extra free in bloom.

Victor Hugo. Dark purplish foliage; flowers deep orange-red.

Price, 20 cents each, \$2 per dozen, \$15 per 100.

New Roses for 1897.

The New Climbing Rose, YELLOW RAMBLER (Aglaia).

The Only Hardy Yellow Climbing Rose Yet Introduced. A Worthy Companion to the Wonderful Crimson Rambier.

This rose, we are confident, is an even more valuable introduction than the CRIMSON RAMBLER. It was originated by the prominent German rose-grower, Mr. Peter Lambert, who has carefully tested it for some eight years, and first offered it to the public only this last season. Its production is a very great triumph in the art of hybridizing. Rosarians have for many years been crossing or hybridizing various roses with a view to obtaining a hardy yellow climbing rose, but the combination of climbing habit and yellow coloring with hardiness was one that it seemed impossible to obtain. Repeated efforts were made to secure it, and the Yellow Rambler represents the most complete success ever attained by any one.

It is perfectly hardy. It has been found to successfully withstand, without protection, a continued temperature of from zero to two degrees below.

It is similar to Crimson Rambler in foliage, habit of growth, and manner of blooming, and is undoubtedly of the same parentage. It is a vigorous grower, well established plants often making shoots from eight to ten feet in height in a single season. The flowers are borne in immense clusters after the same manner as Crimson Rambler, often as many as 150 blossoms in a bunch, and the trusses have the same handsome pyramidal shape as those of Crimson Rambler. The flowers also have the same lasting quality, remaining in bloom three to four weeks without fading, a large bush in full bloom forming one of the most beautiful sights imaginable.

It differs from Crimson Rambler in color, the flowers of this variety being a clear, decided yellow. The blossoms which are of moderate size, cup-shaped, and of very pretty form, are very sweetly RAMBLER in this respect, the flowers of that variety not being fra-

grant. The plants do not bloom at quite so early an age as CRIMSON RAMBLER, but make up for this as soon as well established, by the magnificence of the flowers they produce.

Strong young plants, 2½-inch pots, 35c. each, \$3.50 per dozen.

Extra strong plants, 3½-inch pots, 50c. each, \$5.00 per dozen.

The Yellow Clothilde Soupert, MOSELLA.

A new Rose of exceptional merit, a fitting companion to those fine bedding varieties, Clothilde Soupert and Pink Soupert. Mosella is a beautiful light yellow, shading to a light buff in the centre, and creamy white towards the ends of the petals. Like the "Soupert," it is dwarf and bushy in habit, but is even more graceful. It blooms in clusters, full, double flowers of large size, and flowers most abundantly. With these valuable traits it cannot fail to become very popular. Price, 50c. each, \$4.50 per doz

New Hardy Climbing Polyantha Rose, CRIMSON RAMBLER.

A Wonderful New Rose, the Most Remarkable Novelty in Hardy Roses that has been introduced in Many, Many Years.

This remarkable rose was brought from Japan, and first introduced in England in 1893, where it created a sensation. It received special gold medals wherever exhibited in Europe. It was offered for sale in this country for the first time in 1895. No rose introduced in our recollection equals CRIMSON RAMBLER as a

hardy garden rose. It is a plant that will appeal to the millions.

It begins to flower about the middle of June, and lasts in flower longer than any other hardy outdoor rose. The length of time that the flowers remain in bloom is wonderful-fully three weeks from the time they first open until they go. It blooms in large clusters, with from fifty to one hundred flowers in a cluster, covering the vine its entire length with a solid mass of the most beautiful and perfectly-shaped miniature crimson blossoms. Any description would fail to give an adequate idea of its beauty. The accompanying beautiful photograph of a one-year-old plant grown on our nursery grounds the past season gives a good idea of the freedom with which this rose blooms.

Crimson Rambler is perfectly hardy, and is also a strong, robust grower, making it suitable for all purposes where a rose can be grown. While it is a very valuable climber it can also be grown in bush form, and at the time it is in flower, nothing in that particular color equals it in any way. Nothing we have planted in our experimental grounds has attracted such universal attention as this has the past season, the brilliancy of flowers and the great masses in which they grow making it particularly striking. It is even better than it was supposed to be when it was introduced. plants grown for trial proving it to be not only a magnificent rose, but one of the showlest and most beautiful of all hardy plants. It also makes one of the most beautiful pot plants for florists' use, and is particularly adapted for flowering for Easter, well-grown plants the past season having proved one of the finest novelties grown for this purpose. The freedom with

which it blooms, and the length of time the flowers remain on the plant, make it an unusually fine plant for this purpose. Price, strong plants, 3½-inch pots, 25c. each, \$2.50 per dozen. Extra strong plants, 5-inch pots, 50c. each, \$5.00 per doz. Strong blooming field-grown plants with canes 4 ft. long, \$1 each, \$9 per doz.

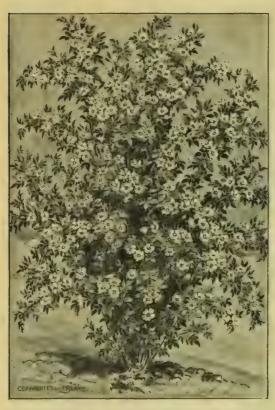

SOUVENIR du PRESIDENT CARNOT.

Ivory-white, shading to a beautiful pearly pink in the centre; a fine, bold flower, very large and of exquisite form, with good stiff stem and handsome foliage. The plant is of extra vigorous growth, and very free flowering. Taking it all in all, it is one of the finest roses ever introduced. Equally good for winter forcing or outdoor culture in summer. Price, 30 cts. each, \$3.00 per doz., \$20 per 100.

An Everblooming Hardy Yellow Rose Mile. GERMAINE TROCHON.

Among the many new Roses of late years there are none which are liable to have a wider popularity than this. It is an entirely new color in the Hybrid Tea class, and it has proven hardy in our climate. Technically described, it is orange-yellow, with shades of buff, fawn and light yellow; the interstices between the petals show depths of coloring approaching what is very frequently seen in our sunset skies. Price, 60c. each, \$6.00 per doz.

Lord Penzance's New Hybrid SWEETBRIARS.

Lord Penzance's New Hybrid Sweetbriars.

This rose possesses one of the sweetest perfumes that nature has provided, and it is usually cultivated for its delicious fragrance. The flowers are borne in wondrous profusion, and vary in color from white, through several shades of pink, to very dark red or crimson. The plants are perfectly hardy. For vigor of growth there is scarcely anything in the rose world to equal them. The buds are the most graceful, sweet and delicate objects imaginable. The flowers are single or semi-double, and this adds lightness and elegance to their beauty. Three distinct varieties of merit; 75 cts. each. The set of three for \$2.00.

ROSA MULTIFLORA JAPONICA.

This beautiful Japanese rose, while not new, is so rare as to be practically a novelty to the great flower-loving public. It is of peculiar beauty and interest, and an exquisite thing in every way. The plant is a strong, vigorous grower.

It flowers profusely in large clusters, with from twenty to fifty flowers in each, covering the plant with dense masses of snowy white blossoms with bright golden stamens. A valuable feature of the flowers is their wonderfully sweet fragrance, which is noticeable at a considerable distance. The individual flowers last a long time, the plants showing bloom for about a month, and are followed by bright red heps, or seed pods, exceedingly handsome, making the plant attractive after the flowers are gone. The plant is perfectly hardy, and will be found to be a charming addition to any collection.

Strong field-grown plants, 35c. each, \$3.50 per doz. Extra strong plants, 50c. each, \$5.00 per dozen.

ROSE CARMINE PILLAR.

A splendid Rose, with single flowers 12 to 15 inches in circumference, of the brightest rosy earmine, and produced so abundantly that last year's shoots, some 10 to 12 feet in length of growth, were covered from base to top with bunches of flowers from each eye or bud, the flowers on the bunches opening in succession.

The display was thus kept up for nearly six weeks, during which it was seen by many leading amateurs and others, and pronounced novel and most decorative. Award of merit by Royal Horticultural Society and certificate of merit by Royal Botanical Society. Those who have seen the rose at Kew when in bloom pronounce it a magnificent sight. 50 cts. each, \$5.00 per doz.

The New Hybrid Multiflora Rose, DAWSON.

This lovely climbing rose was raised in the Arnold Arboretum by Mr. Jackson Dawson, by crossing the MULTIFLORA with GENERAL JACQUEMINOT. It is as vigorous a grower as the Rosa MULTIFLORA, blooming in dense masses, or clusters, the same as that variety, but the flowers are nearly as double as those of GENERAL JACQUEMINOT. The color of these roses is a light rose-pink, shading lighter as they grow older. The entire plant remains in bloom about a month, the different buds on the clusters coming into bloom in succession. This rose will be a very desirable addition to our hardy roses.

Strong field grown plants, 35c. each, \$3.50 per dozen. Extra strong plants, 50c. each, \$5.00 per dozen.

EMPRESS OF CHINA. A New and Very Valuable Perpetual Blooming Climber.

This variety begins to flower the last of May, and except under especially trying circumstances, such as a protracted drought, blooms repeatedly until very late in the fall. In vigor of growth it is unsurpassed. The flowers are small, but very delicate and waxy; somewhat fragrant, and are borne profusely. The bud is of especially pretty form—pointed, very shapely, and of just the right size for the buttonhole. The open flower is nearly double, and has much the appearance of a Tra Rose. The color is dark red in the bud, changing to a lighter red or pink, like an Apple Blossom, as the flowers open and grow older. Price, strong blooming plants, fleld-grown, 35c. each, \$3.50 per dozen. Extra sized plants, 50c. each, \$5.00 per dozen.

New Hybrid WICHURAIANA ROSES, or the Double Memorial Rose.

New Hybrid WICHURAIANA ROSES, or the Double Memorial Rose.

THESE, the first Hybrids of Rosa Wichuraiana are the grandest novelty of 1897. The habit of these new roses is the same as the Rosa Wichuraiana, or Memorial Rose. The growth is creeping, and therefore they can be used to cover the ground, stems of trees, pillars, posts, trellises, or for any other purpose desired, including pot culture. They are the hardlest Roses I know of, and will stand any climate or exposure. They thrive well in the poorest soil or on a gravel bank. The foliage is finely cut, thick, of a leathery substance, bright green, shining as if varnished, not subject to mildew or any insect, but keeps its full beauty almost until Christmas. The flowers are produced in the greatest profusion, so that a two or three year old plant will produce several thousand most exquisite blossoms, which are deliciously fragrant and last a long time in perfection.

MANDA'S TRIUMPH (Manda). This grand rose is of free growth, luxuriant foliage, and produces large clusters of double nurse white flowers, two inches in diameter, beautifully imbricated and well formed, very sweet scented.

UNIVERSAL FAVORITE (Manda). This is the most vigorous plant of the set. The long branching shoots are covered with dense bright green foliage. The double flowers are over two inches in diameter, and of a beautiful rose color, similar to the Bridesmaid, and deliciously fragrant. A grand variety for any purpose.

SOUTH ORANGE PERFECTION (Manda). This is a gem, growing freely close to the ground, and having multitudes of the most perfectly formed double flowers, about one and a half inches in diameter, soft blush pink at the "cities in bloom, while the growth, which is very rampant, and the luxurious foliage, partake more of the Wichuralana. The single flowers, which are produced in close heads, are nearly two inches in diameter, bright rich pink, with almost a white centre, which lightens up the orange-red stamens, producing an effect which, combined with fragrance, makes it one

Carnations for 1897.

Six of the finest Varieties.

LILY DEAN. White ground, with delicate margin and penciling of clear pink; strong clove fragrance.

MAUD DEAN. Delicate blush white, deepening toward the centre; flower of great substance.

FLORA HILL. Extra large white.

MRS. McBURNEY. Soft, clear salmon.

VICTOR. Clear, brilliant pink; a flower of great size, on strong stems. The finest.

MAYOR PINGREE. Delicate yellow and flesh, red marks; perhaps the best to date. Grand variety.

30 cts. each; \$3.00 per doz.

Choice Collection of Carnations.

ALASKA, purest white. BRIDESMAID, bright, clear pink. DELLA FOX, light pink.

JUBILEE, intense scarlet. METEOR, deep, brilliant crimson-scarlet.

20 cts. each; \$2.00 per doz.

Chrysanthemum Novelties for 1897.

The "Queen of Autumn" still holds sway. A few years ago the Chrysanthemum was content with monopolizing November. Now it has taken possession of October, and claims the best part of December, nor do we grudge it the length of time. What flower can equal it in color? It comes to brighten and cheer us in our dullest weather. The standard of quality is being raised higher each season, and a flower now to be worthy of perpetuation must be extra good. Our list is not a large one, but we flatter ourselves that it comprises the very best varieties that have been produced in recent years; there is not a poor variety in the list. Our aim is to send out the best, and nothing but the best.

PRIZE EXHIBITION SORTS.

- Western King.—This is undoubtedly the sensational novelty of the year; claimed to be the best white yet introduced for commercial or exhibition blooms, or for plants, grown either in bush form or single stems. An incurved flower, with outer petals slightly reflexing; pure white; at best November 1st. Height, three and a half to four feet; stem and foliage excellent. Awarded certificate by National Chrysanthemum Society of England. Winner of the silver vase at Butte, Mont., for best seedling. Also first premium for best seedling at Philadelphia and Syracuse. Certificated at New York, Philadelphia, Chicago, Boston and elsewhere.
- Eureka.—An extra high-class porcelain white. Size and form similar to "Philadelphia;" petalage very abundant and well set; shipping and keeping qualities first-class; stem and foliage all that can be desired. Crown buds, four feet. Certificated.
- Dorothy Spaulding.—Very large, massive flower, with broad cupping petals, finishing to a perfect, solid ball; valuable for its size and fine color; dark rose-pink, shades of "Maud Dean;" stem rigid, foliage full up to bloom. A perfect shipper and keeper; crown buds, extra early, four feet. Certificated.
- Mrs. R. McArthur.—Magnificent clear snow-white; solid petals incurved and cupped; hemispherical in form; stem perfect, with foliage close up to the flower. Terminal or crown buds, three and a half feet. Certificated.
- Maud Adams.—A magnificent incurved, clear yellow Japanese variety; petals cup and interlace, forming a globular ball of great substance and largest size; one of the best late yellows. Terminals, four and a half feet. Certificated.
- Evangeline.—Pure white; similar in form to "Kioto," but larger and more graceful than that beautiful old variety. The petals intertwine into one another in such a manner as to make one of the most exquisite flowers ever raised. Stem and foliage well nigh perfect. It is pronounced by many the greatest novelty of the year. Certificated at New York, Chicago, Philadelphia and Boston by the C. S. A.

Price, 75 cents each, \$7.50 per doz.; the collection of six sorts, \$3.75.

NEWEST AND RAREST VARIETIES.

Miss Agnes L. Dalskov (Pink Ivory).

—A sport from that gem among Chrysanthemums, "Ivory," which for specimen plants and cutting purposes has never been excelled. This pink variety is identical with the white, except that it grows somewhat stronger. The color is a beautiful clear pink.

Mrs. Perrin.—A rose-pink variety of great merit. Flowers are large and beautifully formed; extra fine stem and foliage.

Miss Helen Wright.—An ideal flower; pure ivory-white, gradually assuming the faintest tint of pink with age. Large, symmetrical bloom; stem and foliage first-class.

Mrs. R. Crawford.—A splendid white, of exquisite form; like "Ivory," but much larger.

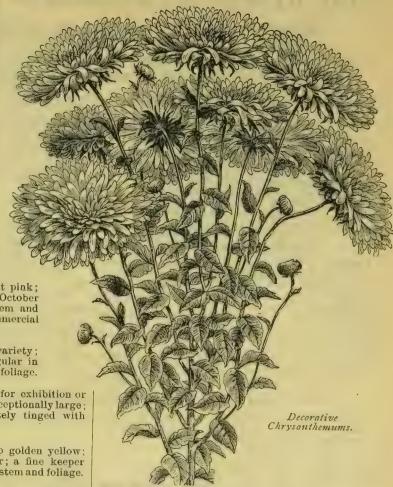

Glory of the Pacific.—A magnificent pink; one of the earliest, ready to cut October 8th. Dwarf habit; strong, stiff stem and excellent foliage. A grand commercial variety.

New York.—Extra large incurved variety; flower of great substance and regular in outline; pure white; fine stem and foliage.

Violescent.—A magnificent variety for exhibition or commercial purposes. Flowers exceptionally large; color white, lower petals delicately tinged with lavender.

Liberty.—Probably the best late deep golden yellow; at its best December 10th and later; a fine keeper and shipper; habit dwarf; perfect stem and foliage.

Mrs. H. H. Battles.—Large incurved Japanese bloom, form of "Ivory," but larger; white, shading blush at base; strong, sturdy habit; in perfection during December.

Modesto.—Many well-known experts pronounce this the finest yellow variety yet produced, either for exhibition or trade. Intense in color, unsurpassed in size. Incurved, with very high, full centre.

Price, 20 cents each, \$2.00 per doz., \$12.00 per 100.

STANDARD FLOWERING VARIETIES FOR MARKET.

Ada Spaulding .- Rich, deep pink; fine form.

Erminilda,-Rosy pink.

Harry E. Widener .- Lemon-yellow.

H. L. Sunderbruch.-Golden yellow.

Ivory.—Snowy white.

Mme. F. Bergmann .- Early white.

Mrs. Jerome Jones .- White, flamed with rose.

Marie Louise.-Recurving white.

Major Bonnaffon.—Clear yellow; very large and fine.

Minerva.—Golden yellow.

Philadelphia.—Color white, illuminated with yellow; a splendid sort for cutting.

Pink Ivory .- Shell pink.

The Queen,-The finest double white.

Viviand-Morel .- A grand light shade of pink,

Wm. H. Lincoln.—Golden yellow.

Price, 15 cents each, \$1.50 per doz., \$8.00 per 100.

NEW HYBRID JAPAN IRIS, or FLEUR DE LIS.

The Grandest Novelties of 1897. HARDY.

No First-Class Garden Should be Without Them. Once Planted They Last Forever, Requiring but Slight Care.

SEE COLORED PLATE.

We Offer the Entire Collection of 40 Distinct Varieties for \$10.00.

SECTION I.-LARGE DOUBLE-FLOWERING VARIETIES.

Beauty.—Lilac, veined purple; magenta centre. Orion .- Reddish pink, white centre.

Zenobia.—Deep rose, shaded and veined violet, lilac and yellow centre.

isabella.- Light pink, shaded light violet. J. C. Vaughan .- Pure white, very large and fine.

New York .- Reddish maroon, mottled white, yellow centre.

Beth. Hallock .- Delicate lavender, slightly veined white; extra fine satiny finish, clearly marked citron.

Robert Craig.—French gray, veined violet. Victor.-White, veined violet-purple; violet-purple

centre. Clothilde. - Carnation pink, shaded light violet; lemon colored centre.

Price, 50 cents each; the set of 10 for \$4 00

LYCORICE AUREA (Nerine). -Golden yellow. 50 cts. each; \$5.00 per dozen. NOVELLOS ITOM Japan Nerine Japonica.—Beautiful pink flower. 20 cts each; \$2.00 per dozen.
White with rose a grand variety, 25c, each; \$2.50 a doz. LILIUM KRAMERII.—White with rose, a grand variety. 25c. each; \$2.50 a doz.

NOVELTIES IN FERNS FOR 1897.

Asparagus Sprengerii.

A most desirable new species, especially useful to grow as a pot plant for decorative purposes or for planting in suspended baskets; the fronds are frequently 4 feet long, are of a rich shade of green and most useful for cutting, retaining their freshness after being cut for weeks, besides plants of maturity bear beautiful large berries of coral red. It will make an excellent house plant, as it withstands dry atmosphere, and will succeed in almost any position.

We consider this a first-class plant in every way, and having succeeded in growing a large stock, we are enabled to offer it at a very low price.

Extra strong plants in 4 inch pots, 50 cts. each, \$5.00 per doz. Strong plants in wire baskets, basket and all complete \$1.00.

Pteris Serrulata Zellerii.

A distinct novelty, of very dwarf and compact habit, with slender arching fronds, measuring about 9 to 12 inches each way. A valuable addition to the limited list of suitable Ferns for table jardiniere work. Price, 25 cts. each, \$2.50 per doz.

Pteris Umbrosum Giganteum.

The grandest addition to the Pteris family in many years; fine for specimens. \$1.00 each, \$9.00 per doz.

Nephrolepis Cordata Compacta. (New Sword Fern.)

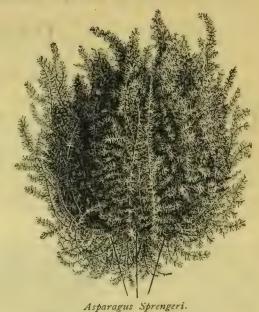

Our introduction; superb decorative Fern. Strong plants. Price, 50 cts. each and upward.

Nephrolepis Exaltata var. Bostoniensis.

This variety grows more slender than Davallioides Furcans, and the fronds grow longer. This is the variety grown around Boston, which has been so popular, and for which there has been so much demand the past season. It has been commonly called the Boston Fern. Price, \$1.00 and upward.

Dracaena Lord Wolseley.

One of the finest Dracenas of recent introduction. The leaves are of a firm substance, measuring from $2\frac{1}{3}$ to 3 inches across, by 24 to 30 inches in length. The ground color is greenish maroon, margined and splashed with crimson. Each, \$1.50.

Adiantum Siebrechtii.

A distinct and robust form, supposed to be a cross between A. decorum and A. Williamsii. The strong and vigorous fronds are thickly set with individual round pinnæ of a hardy texture. The piant is free in growth and exceedingly graceful; all these good points make it of extra value for decorative purposes. \$1.00 each, \$9.00 per doz.

PALMS.

Including all the various types of Palms, Cyclanthaceas and Cycadeas.

CLASS of plants especially noted for their majestic and very imposing character, and rightly called the monarchs of the vegetable kingdom. They are of great decorative value. Their grand appearance, their magnificent foliage, and their universally graceful and imposing habit distinguish them from all other plants. No collection is complete without Palms; they are unrivaled for the decoration of greenhouses and conservatories, parlors and halls, and many establishments have stately structures used especially as Palm houses. Twenty years ago but few varieties of Palms were to be found in collections, as gardeners then generally supposed them difficult to cultivate, but now we find large numbers of species and varieties of Palms, Cycads, Zamias, etc., in nearly all the prominent gardens. They can be justly recommended for their great usefulness, beauty and easy cultivation; in all modern decorations of churches, public and private festive halls, as well as for floral exhibitions, handsome specimens of Palms are the main factors, and are indispensable.

Our house of Kentia Belmoreana, 20 x 240 feet, showing the greatest stock of this Palm in the United States.

Foreseeing the steadily increasing taste and demand for these noble plants, we prepared our houses and stock for it, and, at great expense, continued cultivating and increasing our now unlimited supply. We have added year by year a number of new, handsome and distinct species and varieties, and our stock is now of such magnitude that it must be seen in order to form the least idea of it. As most of our stock is raised in our own plantations and tropical nurseries in Trinidad, West Indies, and cultivated and perfected in our extensive Palm houses at Rose Hill Nurseries, New Rochelle, N. Y., we are enabled to supply the trade of the country at most reasonable and popular prices.

The culture of most species of Palms is comparatively simple. On an average they give less trouble than the majority of plants, enduring rough usage, smoke, dust, and changes of temperature in most heroic fashion.

All the species in the following list require for their successful cultivation an average temperature of from 50 to 60 degrees; but when used as decorative plants for greenhouses, conservatories, winter gardens, or even for outdoor decorations, will endure without harm an occasional drop to 40 degrees in the temperature.

| CYCADS. | |
| 46 Cycas circinalis. This grand and most magnificent specimen stands twelve feet high, | |
| with a clean trunk or stem two feet in circumference, having 50 fine fronds, each | |
| eight feet long; perfect in shape, and is probably the finest specimen in America. | One specimen |
| 47 Cycas Lehmanii. Truly a noble plant of a most elegant and very distinct species. It | I - OWNEROW |
| is the only specimen in this country so far as is known, and has a clear stem or | |
| trunk two feet high and a foot in diameter, with 56 perfect fronds. The plant has | |
| a twelve-foot spread; its leaves are of a beautiful arching and graceful character, | |
| and measure seven feet in length, with still another new growth of many more new | |
| fronds starting | One specimen |
| | |

convenience.

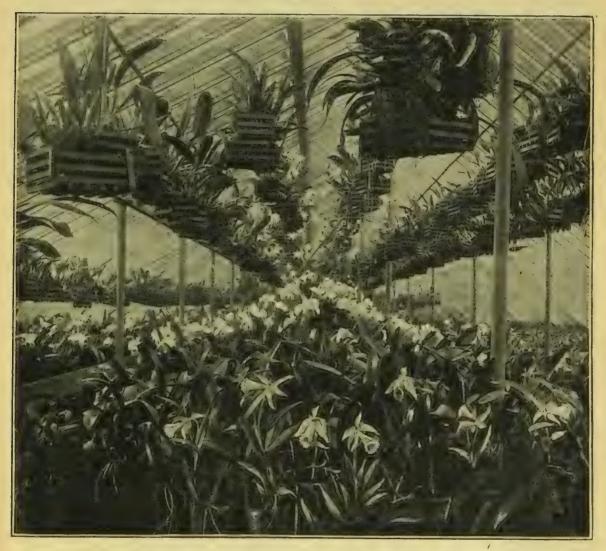

| A DECEMBER OF THE PROPERTY OF |
|---|
| 48 Cycas Rumphii. This, another grand specimen, is much like the foregoing, but of a different species; it is of a beautiful compact habit; and its wide-spreading, handsome fronds are of a somewhat glossy, rich green color. The plant has a two-foot stem or trunk, and a ten-foot spread, with 50 perfect fronds, each six feet in length; also the only specimen of its kind in the country, so far as is known One specimen |
| 49-50 Cycas revoluta. (Commonly called the "Sago Palm.") Noble specimens, with stems |
| fully six feet high, well proportioned, with upwards of 100 fronds—a magnificent pair |
| 51 Cycas revoluta. A beautiful specimen, with five-foot stem, well proportioned, and with 40 fronds, all perfect |
| 52 Cycas revoluta. A splendid plant, with four-foot stem; of good shape, with upwards of 40 fronds |
| -53-54 Cycas revoluta. Elegant specimens, three-foot stems; in fine shape, with upwards of |
| 55 Cycas revoluta. A fine specimen, with a 31/2-foot stem; a magnificent plant, with |
| splendid head of perfect leaves |
| 56 Cycas revoluta. A beautiful specimen, with three-foot trunk and perfect head One specimen 57-58 " Grand specimens; a fine pair, with 2½ foot stems and good heads Two specimens 59-62 " Magnificent specimens, with two-foot stems, well proportioned Four specimens 63-72 " Very handsome specimens, with eighteen to twenty-inch trunks, all |
| with magnificent heads |
| Cycas revoluta. Splendid half-specimens, with trunks from one to 1½ feet, all with perfect heads and a number of leaves |
| 73 Dioon edule. A grand specimen, with a clear stem of three feet, and a perfect head of 10 fronds |
| 74-76 Dioon edule. Handsome specimens, with one-foot stems and good heads Three specimens |
| 77 Zamia Lindenii. A most magnificent specimen, with a two-foot clear stem, and 14 elegant fronds six to seven feet long |
| 78-79 Zamia Roezlii (true). Beautiful specimens, seven feet high, with seven perfect fronds and strong trunks |
| |
| 80-81 Zamia Mexicana. Beautiful specimens, of compact, dwarf habit, and dark purplish green gracefully curved leaves, about four feet high |
| |
| green gracefully curved leaves, about four feet high |
| TREE-FERNS. |
| TREE-FERNS. Besides this list of extraordinarily large and handsome specimens, we have many half and three-quarter specimens closely approaching the sizes mentioned and described below. For full list of Tree-Ferns, see Ferns. 82 Alsophila australis. Handsome specimen, with stem of four feet, crowned with eight large perfect fronds of a charming rich green color; the plant has a six-foot |

etc., promptly supplied on application. Please mention plants by the numbers in front of the names, for

ORCHIDS.

The Culture of Orchids is one of our great Specialties.

E are the pioneers in commercial Orchid growing, and from our long experience we know which are good and which are not good. We cultivate only the best varieties and offer the best plants only, as represented, or will replace same, or refund the cash.

Rose Hill Nurseries-View of one of our Orchid Houses (Cattleya).

It is a well known fact to those interested in Orchids that these plants are becoming very scarce in their native habitat, and that, at a day not far distant, it will not be possible to obtain large consignments of fine plants, as in recent years, hence we have been compelled to provide another source of supply, viz: that obtained through hybridization, which has become an important factor in the development of valuable and improved varieties and is watched with considerable interest by lovers of Orchids. At first glance this would seem to be a long, tedious and unprofitable process, yet after the first hybrids make their appearance, the hope of obtaining some new and valuable variety inspires the ardent worker, and may well repay him for all his trouble, as quite often a plant worth hundreds of dollars will be the result. Hybridizing Orchids bids fair to become very popular.

In the list which follows we simply present the names of the most showy and taking varieties, which we offer at popular and not fancy prices, plants such as any one can cultivate in a light, sunny window or conservatory, if they have no greenhouse. For further information upon Orchids, apply for our General Catalogue.

Our establishment is considered Headquarters for Orchids.

| ANGULOA Ruckeri \$2 50 to \$3 50 | CATTLEYA Eldorada splendens \$5 00 to \$10 00 |
|--|---|
| Clowesii | Wallisii (or Virginalis). A pure |
| eburnea 3 50 to 5 00 | white Cattleya, flowering in September. |
| virginalis 5 00 to 7 50 | Sepals, petals and lip pure white, with |
| BRASSAVOLA acaulis 1 50 to 2 50 | orange-yellow throat; very sweet- scented \$15 00 to \$25 00 and upward |
| | Gaskelliana 1 50 to 3 00 |
| glauca 1 50 to 2 50 | |
| Digbyana (Lalia Digbyana) 1 50 to 2 50 | gigas. The Giant-flowering Cattleya |
| BRASSIA maculata 1 50 to 3 00 | \$2.50, \$5, \$10, \$25 and \$50. |
| maculata major 1 50 to 2 50 | gigas, vars |
| verrucosa | —— Sanderiana |
| — grandiflora | guttata 2 50 to 3 50 |
| BURLINGTONIA candida 2 00 to 3 00 | — Leopoldii 3 00 to 5 00 |
| fragrans | Harrisoniana 1 50 to 2 50 |
| | imperialis (gigas) 3 50 to 5 00 |
| CALANTHE oculata gigantea 1 50 to 2 50 | intermedia 1 59 to 2 50 |
| Regnierii | —— superba 2 50 to 3 50 |

Collections of Orchids.

In forming collections of Orchids, whether large or small, it is of the utmost importance to begin aright, if, besides being beautiful, we wish them to be practical and useful. Thus, in order to have Orchids in bloom throughout the year, a careful selection of such varieties as will give a succession of bloom is necessary. Such assortments may also include a wide range of form and coloring in the flowers. All who are not familiar with the many species, varieties and habits of these plants will find it perfectly safe to intrust the selection to us, as we often make up such collections for customers, always to their entire satisfaction. We need only to know for what purpose the Orchids are desired, and to have some idea of how much money the customer wishes to invest in the collection. Botanical collections of Orchids are formed in quite a different way, by selecting from different genera, species and varieties; this we undert he also, performing the work in a scientific and satisfactory manner; the purchaser, however, must give us an idea of the number of specimens wanted and the number of dollars to be invested. The preceding extensive list includes all the best and most useful varieties.

Some of the very rare and costly varieties of Orchids which we have in stock are not mentioned in this Catalogue, as we have very few specimens of each of them—in some cases only one. But to all who desire very rare Orchids, and will address us, mentioning this fact, we will give particulars of such plants, sending samples of their flowers when this is requested.

As might be supposed, among our vast collection of Orchids there are new and rare varieties of great beauty and value constantly coming into bloom—some of them for the first time. We keep the more enthusiastic of our patrons well-informed concerning the flowering of these plants, and would suggest to all who are forming collections of Orchids that they send us their names and addresses, so that we may advise them of the blossoming of any new or rare plants.

Orchid Miscellany.

The culture of Orchids presents no special difficulty; there are no "secrets" which must be found out in order to succeed, but all who wish more explicit directions concerning their culture than can be given here will find them in our "Manual of Orchid Culture"—a short, practical treatise on this subject.

We would also call special attention to the unusually fine quality of our Orchid peat, acknowledged to be the best fibrous peat in this country. We supply it in large and small quantities; also live and dry Sphagnum Orchid cribs and pots—in fact all requisites for the Orchid house, a detailed list of which will be found in our list of Supplies and Requisites.

General List of Stove and Greenhouse Plants.

This important department includes all the best genera, species and varieties of flowering and foliage plants which are grown under glass, either in a stove or warm-house temperature, or in a greenhouse or cool-house temperature. The majority of tender flowering bulbs form a sub-department; the bulbous and tuberous forms, grown for their beautiful leaves, are classed here with other foliage plants.

NEPENTHES.

This curious and interesting class of plants thrives best in a warm, moist atmosphere, and all the forms are usually suspended from the roof in baskets. Complete shade and a compost of two parts peat with one of sphagnum moss, plenty of drainage and an abundant supply of water, will grow them to perfection. They should always be thoroughly shaded. Our collection of these highly ornamental plants is unequaled in America, many new and beautiful varieties obtained by hybridization, which are not to be found elsewhere, being included. The large size of their interesting pitchers, the brilliant coloring and variety of form make them desirable for any collection of plants.

Bulbs and Tubers for Stove and Greenhouse Culture.

Many of our most showy and brilliant flowering plants have bulbous or tuberous roots, which, with but a minimum of care, are very free of bloom. Our Amaryllids will be found worthy of especial attention; we make a specialty of this suberb genus, and are headquarters for it. Some of the species are peculiarly adapted to house culture, thriving exceedingly well in an ordinary window, and presenting their brilliant flowers in winter and early spring. We have many rare species, and grow them to great perfection at our Tropical Nurseries in Trinidad. The beautiful new hybrids are fine for early forcing.

Hardy Flowering Bulbs and Tubers.

O CLASS of plants can give more genuine pleasure to their owner than those which spring from hardy bulbous or tuberous roots, a delightful stimulus to the work of planting and caring for them being the fact that they are sure to flower, not only the first season but for years afterwards, the number of flowers increasing as the clumps grow in size. So large, varied and adaptable is this class of plants that their flowers brighten every season of the year—Crocus, Snowdrop, and a train of magnificent Dutch bulbs usher in the early spring, other genera and species, equally as handsome, flower through summer and autumn, and potted Dutch bulbs bloom readily in winter. Immensely popular as these bulbs and tubers are, many more of them would be planted if planting and flowering time came in the same season. The spring and summer display of their brilliant blossoms at once causes a great demand for the roots, for which the proper planting time is in autumn. We offer a select list of all the best Hardy Flowering Bulbs and Tubers.

Ferns and Selaginellas.

O COLLECTION of plants is complete without Ferns and Mosses. Their beautiful foliage seems especially fitted to combine with all brilliant and lovely flowers; and to supplement the majestic elegance of the Palms and Cycads, we have the large tree forms. A vast variety there is, too, among them, from the delicate, transparent green fronds of the finer Adiantums to the bold and handsome foliage of the Nephrolepis and Pteris; or from the lovely Selaginellas, carpeting the ground, to the stately and tall Tree Ferns.

The appreciation of Ferns has increased vastly of late years, and they are now extensively used for all decorative purposes, and in all elegant floral work. Our extensive and carefully grown stock affords ample opportunity for buyers to select any forms which may please their fancy or suit their convenience. New and really valuable species are constantly being added to our stock. These will be found in New and Rare plants.

TREE FERNS.

HE stately grace and elegance of the wonderful Tree Fern is beyond description. Vying with the Palms, they are of the greatest beauty and utility for all decorative purposes, and have a charm belonging to no other order of plants. No tropical greenhouse is complete without them. We are constantly importing fine, healthy stems of all the leading varieties, as well as some new and rare species, all of which we offer at moderately low prices. We have also many large and extra-large specimens of extreme beauty in perfect condition, the prices of which can be had on application. For particulars as to varieties and sizes of these specimen Tree Ferns, see page 39.

Azaleas and Rhododendrons.

Including both Tender and Hardy Species.

Our collection of these superb shrubs or dwarf trees, so indispensable for winter flowers and for massing in bold outdoor groups, is easily the largest and choicest one in America. As they are most effective when intermingled, either for greenhouse or lawn decoration, we group them under one general head, including both tender and hardy species. They are grown in fine shape and well rooted. All tints and shades of color are represented in the best terrest flowers. in the best types of flowers.

Varieties of Azalea Indica.

For winter and early spring flowering, the greenhouse Azaleas become more popular every year. Perhaps no other class of plants yields such a brilliant display of flowers for so little care. The experience of many years has taught us that the dwarf standard or crown head is decidedly the best form in which to grow Azaleas for this country, and we therefore offer only plants in that shape. The following collection embraces all the very best and most distinct sorts of both old and new varieties:

A. Borsig. Pure white.

Alba speciosa plena. Double white.

Apollon. Brilliant red.

Baronne de Vriere. White flower, ribboned with light red.

Baron Nathaniel von Rothschild. Double purpleviolet.

Bernhard Andrea. Double; bright rose.

Bernhard Andrea alba. Fine; pure white.

Candidissima. Excellent; pure white.

Cassandra. White, pointed with red.

Chas. Darwin. Double white, pointed rose.

Ch. Encke, Rose, edged with violet.

Comte de Chambord. Very large; salmon-rose.

Comtesse de Flandres. Striped, salmon-rose.

Deutsche Perle. Double white; good for bouquets; one of the very best Azaleas.

Distinction. Fine large rose flowers.

Dr. Liebig. Highly colored, rich crimson; large and full; very floriferous.

Duchess Adelaide de Nassau. Amaranth-red and and vermilion-orange.

Duchess de Flanders. Variegated variety.

Duc de Nassau. Dark rose carmine.

Flag of Truce. Double white; very fine.

Gloire de Belgique. White, striped with carmine.

Grosfurstin Helenc. Orange and deep brown spots.

Gustave Guilmot. Striped flowers; good for forcing. Harlequin. Striped and blotched with rose and violet.

Herman Seidel. Double; lively rose.

Le Flambeau. Very deep crimson.

Mme. Louise de Kerchove. Large white flowers, with orange blotches and flesh-colored circles.

Mme. J. E. Plancheon. Large flowers of clear white, striped yellow

Mme, L. Van Houtte. Scarlet flowers, striped with white.

Mme. Van der Cruyssen. Deep rose.

Marshall P. Wilder. Double white, dotted and striped with lilac-rose.

Marquis of Lorne. Orange, with yellow blotches.

Memoire de Louis Van Houtte, Brilliant rose

Meteor. Double; bright rose.

Narcissiflora flore pleno. Double white.

Oswald de Kerchove. Lively lake-rose, with flery blotch; splendid habit.

Pauline Mardner. Rose; double; a fine sort.

Pluto. Blood red, large flowered Azalea.

Princess Charlotte. Lively deep rose.

Roi de Beauties. Rose, edged with white.

Roi de Holland. Fiery red; very free flowering.

Roi Leopold. Double orange.

Sacountala. White flowers, double.

Senator Van Camp. Double; carmine, with deeper

Souvenir de Arthur Veitch. Single; satiny salmoncrimson, blotched deep red.

Souvenir de Francois Vervæne. White, striped rose. Souvenir de Princess Albert. Double light rose

and variegated flower. Vesuviana.

Vesuvians. Rosy orange-red, blotched white.

Price for strong plants, \$1 to \$2 each and upward.

Hardy Azaleas.

The hardy species of Azalea are quite as handsome in their way as the greenhouse varieties. In early spring and summer they are gay masses of bright bloom. We offer only the best and most distinct sorts. They are trained into shapely form, and all a e well-rooted. The native as well as the foreign varieties are quite handsome, and being naturally adapted to our soil and climate, thrive with very little care.

AZALEA amoena. Dwarf and bushy, with bright rozy purple or reddish flowers. 50 cts.

calendulacea. Large, widely open flowers of pure yellow, orange, or bronze-brown and reddish colors.

nollis. A Japanese species, with large, downy, very brilliant flowers of red, yellow, orange and primrose. 50 cts. to \$1.

AZALEA nudiflora. Clustered rose and light pink flowers.

Pontica. 50 cts. to \$1.

Pure white, sweet-scented flowers, borne viscosa. profusely, trusses of medium size. A dwarf-growing native shrub, that thrives best in somewhat damp and shaded situations. The flowers and eaves ap-pear together; the latter have a silvery tint beneath

Price, except where noted, 50 cts. each and upward.

Hardy Rhododendrons.

These, aside from Conifera, are the most important Evergreens in cultivation. The foliage is handsome all the year, but the superb flower cones are the chief charm of the family. We keep a fi e assortment of the best varieties of the hybrids of R. Catawbiense and R. Manimum, all of which constitute our best sorts, thoroughly hardy for outdoor planting. Rhododendrons grow well in any good loamy soil moderately enriched with vegetable mold. A mulch over their roots in summer and a slight protection in winter greatly benefit them. Cut off all dead flowers and seed node. dead flowers and seed pods.

BEST NAMED VARIETIES.

These are all distinct in color, hardy, and of fine form.

Auguste von Geert. Rosy purple, with brown spots.

Blandianum. Rosy carmine.

Bylsianum. Bright rose, with white center.

Charles Bagley. Clear, bright cherry-red.

Duc Adolph de Nassau. Lilac-carmine, with dark blotches.

Everestianum. Rosy lilac, dotted with brown.

Earl of Shannon. Bright cherry-red, with darker blotches

Frederick Waterer. Deep, brilliant crimson.

Gloire de Bellevue. Bright rosy carmine.

Helene Waterer. White, with rich crimson margin. James Bateman. Rich scarlet.

James Marshall Brooks. Bright scarlet, spotted with brown.

John Spencer. Deep rose, margined with deep pink. Joseph Witworth. Dark lilac, with black spots.

J. Fiala. Soft rose, blotched with brown.

Lady Annette de Trafford. Cream color, with chocolate markings.

Lady Winnifred Herbert. Rosy crimson, with paler centre.

Mrs. Hunnewell, Rich crimson.

Oldport. Rich plum color.

Pres. J. N. Bauman. Beautiful rose.

Princess Louise. Pure white.

Princess Marie. White, edged with rosy purple

Raphael. Bright rose.

Sir Charles Napier. Rosy carmine.

Sir Thomas Sebright. Rich purple, brightened with bronze.

Surprise. Rosy lilac, with chocolate blotches.

Strong plants, well set with buds, \$1 and upward, according to size. Special rates on large quantities.

UNNAMED CATAWBIENSE SEEDLINGS.

The best and hardiest strain, in all varieties and colors. Strong plants, well set with buds, \$1 and upward, according to size. Special rates on large quantities.

Rhododendron Vaseyi. 50 cts. to \$1.

Roses.

In praise of the Rose nothing new or important remains to be said. No flower will ever supersede it in popular estimation—not even the Orchid, so often counted as its rival. Our position as the largest commercial Orchid growers in America is well known, yet we affirm that one flower is as fair as the other, each having a distinctive beauty all its own. At Rose Hill Nurseries the "Queen of Flowers" receives attention equally with Palms, Orchids and Ferns. We grow immense quantities for cut blooms, and test carefully all the sorts offered, retaining only those that pass the crucial trial of the New York rose-buying public, which quickly rejects anything not up to a high standard in color, form and fragrance. We also have carefully grown plants of the many superb hardy Roses withou; which no place, however small, is complete.

Hybrid Perpetual or Remontant Roses

Abel Carriere. Rich, velvety maroon.

Alfred Colomb. Bright carmine-red.

Anna Alexieff. Bright rose color.

Anne de Diesbach. Clear carmine.

Auguste Mie. A grand old variety, of delicate deep rose.

Baron de Bonstetten. Rich velvety maroon.

Baronne Prevost, Pure rose.

Baroness Rothschild. Delicate rose.

Black Prince. The darkest Rose in cultivation. Deep velvety red. 50 cts.

Duchess de Cambaceres. Pale pink.

Duke of Edinburgh. Brilliant scarlet-crimson flowers, shaded maroon.

Fisher Holmes. Deep glowing crimson.

Francois Levet. Cherry-rose.

General Jacqueminot. Brilliant crimson.

General Washington. Bright reddish crimson or soft scarlet.

Heinrich Schultheis. Rich crimson.

John Hopper. Fine rosy crimson, back of the petals

Jules Margottin. Bright cherry-red.

Jeannie Dickson. Rosy pink, with a lighter silvery edge and zoned with pale yellow at the base. 75 cts.

La Reine. Rosy pink, tinted with lilac.

Longfellow. Violet-crimson.

Lord Raglan. Color scarlet-crimson, with violet tinted edges.

Mabel Morrison. Pure white.

Mme, Alfred Rougemont. White,

Mme. Charles Wood. Reddish crimson, bright and clear

Mme. Eugene Verdier. Light silvery rose.

Mme. Gabriel Luizet. Very distinct clear pink.

Mme. Hardy. White.

Mme. Lacharme. Pure white.

Mme. Plantier. White. Magna Charta. Bright pink flowers.

Margaret Dickson. White, with pale flesh center; petals very large, shell-shaped. 75 cts.

Marie Baumann. Light crimson-red, with white

Marshall P. Wilder. Cherry-carmine.

Merveille de Lyon. White, lightly tinted with rosepeach.

Mrs. George Dickson. Delicate soft pink. 75 cts.

HYBRID PERPETUAL ROSES-Continued.

Mrs. John Laing. Clear bright pink.

Paul Neyron. Deep rose.

Prince Camille de Rohan: Dark crimson-marcon.

Queen of Queens. Pink, with blush edges.

Reynolds Hole. Maroon, shaded with crimson.

Sultan of Zanzibar. Blackish maroon.

Triomphe de l'Exposition. Rich crimson.

Ulrich Brunner. Bright cherry-red.

Victor Hugo, Extra bright crimson-red,

White Baroness. Purest white.

Price, except where noted, of any of the above Roses, either on their Own Roots or Grafted on our Japanese Stock:

Strong two-year olds, in dormant state (not started to grow), 50 cts. each, \$5 per dozen.
Fine one-year old plants, dormant, 35 cts. each, \$4 per

Extra strong two year-old pot-grown plants, which can be set out at any time, and are also excellent for winter forcing (these are the plants which produce the large Roses sold by the florists in winter), 75 cts. to \$1 each, \$8 to \$10 per dozen, according to sort.

Tea and Hybrid Tea Roses.

Including the "Everblooming" Roses and the Noisette Hybrids.

This large class contains the favorites which give us flowers every day in the year. They are not hardy, but can easily be wintered over with protection; and even if frozen to the ground, will often send up shoots from If frozen to the ground, will often send up shoots from the roots in spring; these grow fast and are soon ready to flower. Formerly no really red roses were found in this class, that color being peculiar to the Hybrid Perpetuas; but we now have a number of beautiful Everblooming Roses in all shades of rich red. For forcing into bloom in winter the Teas are pre-eminent. The plants we offer are all strong and vigorous, on their own roots, and will give satisfaction either for planting out or forcing.

planting out or forcing.

American Beauty. Deep rich rose.

American Belle. A pink-colored sport from American Beauty.

Bon Silene. Bright deep rose, delicately tinted with deep red.

Bridesmaid.

Captain Christy. Light salmon flesh color.

Catherine Mermet. Bright flesh color.

Celine Forestier. Fine bright yellow.

Cornelia Cook. White flowers.

Duchess of Albany. A sport from La France; deeper in color.

Etoile de Lyon. Rich saffron yellow.

Gloire de Dijon. Buff, with orange centre.

Isabella Sprunt. Canary vellow.

Kaiserin Augusta Victoria. Pure white Hybrid

La France. Peach blossom, changing to rose.

Mme. Caroline Testout.

Mme. Cusin: Purplish rose, centre slightly tinted with yellowish white.

Mme. de Watteville. White, shaded with carmine and bordered with rose.

Mme. Welche. Deep chamois to pale yellow.

Mme. Falcot. Deep golden apricot. Mme. Hoste. Bright, clear, light yellow.

Marechal Niel. (Noisette). Bright golden yellow. Marie Guillot. White, tinged with delicate yellow. Marie Van Houtte. Flowers large and full; yellowish white, edged with rose.

Meteor. Rich, dark velvety crimson.

Mrs. W. C. Whitney. Another new Hybrid Tea Rose, a seedling from American Beauty.

Niphetos. Long, white buds, tinged sometimes with pink.

Papa Gontier. Rosy carmine.

Perle des Jardins. Straw color.

Pierre Guillot. (Bourbon.) Bright crimson.

Safrano. Salmon-buff or apricot.

Souvenir de Wootton. A Hybrid Tea of rich, deep red.

Sunset. An excellent forcing Rose, of a deep apricot color.

The Bride. A white form of Catherine Mermet.

William Allen Richardson. Beautiful orangeyellow.

W. F. Bennett. Long, deep crimson buds.

Price, except where noted, for any of the varieties of the above Everblooming class, on their own roots: Strong, vigorous plants, ready for blooming, 50 cts.

each, \$5 per dozen.

Thrifty young plants, not so large as the foregoing, 30 cts. each, \$3 per dozen.

Bourbon and Bengal or China Roses.

This class, including Rosa Bourboniana and R. indica, comprises varieties especially noted for their vigorous growth, free-flowering habit, richness of color, and easy cultivation. While some are quite hardy, all are nearly so, and require but little protection. They are undoubtedly among the very best general garden roses.

Agrippina (Queen's Scarlet). (Bengal.) Vivid crimson.

Appoline. Bright rosy pink.

Boule de Neige. (Bengal.) Pure white and double.

Bourbon Queen. (Bourbon.) Buff rose.

Catherine Guillot. (Bourbon.) Very bright carmine.

Clara Sylvain. (Bengal.) Pure white.

Crown Princess Victoria. (Bourbon.) Fine sulphur white.

Dinsmore. Rich crimson-scarlet.

Duchess of Edinburgh. (Bengal.) Dark crimson.

Hermosa. (Bourbon.) Rosy pink flowers.

Louis Margottin, (Bourbon.) Satin rose.

Louis Philippe. (Bengal.) Dark crimson, with whiteedged petals.

Mme. Plantier. A grand old Hybrid China Rose, blooming in heavy clusters of pure white.

Oueen of Bedders. (Bourbon.) Beautiful deep crimson. Souv. de la Malmaison. Clear flesh color, shaded fawn.

Price for plants on their own roots:

Strong, 2-year-old pot-grown plants, 50c. each, \$5 per doz.; thrifty young pot-grown plants, 80c. each, \$3 per doz.

Miniature or Fairy Roses.

Including the Polyantha Section.

These tiny Roses are now everywhere general favorites, both for pot culture and for edging outdoor beds of larger growing species. The Polyantha section is especially popular and useful, on account of the vigorous, though dwarf, habit of the plants, their hardiness and freedom of bloom. The small flowers are perfectly formed, well colored, and produced in large clusters.

MINIATURE ROSES-Continued.

Anna Marie de Montravel. White, in great clusters. Clothilde Soupert. Pearly white, the inner ones deepening to rosy lake; this bright centre shows even in the

tiny buds. A free and constant bloomer.

Lawrenceana Multiflora. Double pink. Little Pet. Double white.

Mme. Cecile Brunner. Rosy pink color.

Mignonette. Clear pink.
Miniature. Pink flowers.
Paquerette. Pure white.
Perle d'Or. Coppery gold and salmon color.

Two-year-old plants, 35c. each, \$4 per doz.; thrifty young plants, 25c. each, \$2 per doz.

Hardy Running or Climbing Roses.

These are well adapted for the adornment of pillars, trellises, arbors, or for covering porches or the ends of In their blooming season they are fairly covered with lovely flowers, and are much valued by all discriminating planters of Roses. Being perfectly hardy and of vigorous growth, their successful culture offers no obstacles.

Baltimore Belle. Light blush and rose. Dawson. Deep pink, clustered.

Floribunda. Bright pink, changing to white.

Gem of the Prairies (Rosa setigera). Rosy red flowers. Jeanne d'Arc Perpetual-blooming, white-flowering.
Mrs. Pierce. A beautiful blush-white climber.

Queen of the Prairies. Rosy red, sometimes striped

with white.
Rampaut. Pure white; a free bloomer.

Reine Marie Henriette. A deep carmine-red.

Rosa setigera. Our Native Climbing or Prairie Rose; deep rose-colored flowers.

Rosa Wichuraiana. A trailing Japanese species. Pure white, with yellow stamens, 35c

Setina. Grand pink favorite, ooc.
Wells' White. (Madame d'Arblay). Pure white. Price, except where noted, 50c. each. Extra large plants, 75c.

Moss Roses.

Roses of this class (Rosa centifolia muscosa) bloom in June and July. They are especially prized for their exquisite, mossy buds; the open flowers, too, are quite handsome, and the plants are elegant in growth. Because of their hardy, permanent character they are sometimes neglected in gardens, yet they well repay careful culture.

Blanche (Perpetual White) White, very fine; double.

Blanche Simon. Pure white: fine form.

Comtesse de Murinais. White Moss.

Cristata. Tender rose.
Eugene Verdier. Beautiful crimson.
Glory of Mosses. Rose

Henri Martin. Glossy pink; buds finely mossed.

James Veitch. Large red flowers.

Luxembourg. Deep red, shaded with purple. Mme. Moreau. Large flowers of a beautiful deep red.

Perpetual White.

Princess Adelaide. Bright pink, Soupert et Notting. Color lively rose.

Price for Plants On their Own Roots or Our Japanese

Strong two-year-old plants, 50c. each, \$5 per doz.

Rugosa Roses.

These beautiful, hardy Japanese forms are now attracting much attention. Some of them have been cultivated for years, others are of recent discovery or hybridization. The flowers are large, single or semi-double, and very strikingly handsome; the plants are entirely hardy, with elegant foliage, much wrinkled and of great substance. Most of them bloom throughout the summer, and in autumn are brightened with large scarlet heps.

Alba. Single white.

Rosea. Bright pink.

Rubra. Large, red, single flowers.

Madame Georges Bruant. Pure white.

Strong, well-established plants, 35c. each, \$4 per doz.

Old and Rare Roses.

Including the Sweetbriar, Austrian, and Banksia Roses, etc.

All the forms here described are beautiful and worthy of cultivation, although in the search for novelty in color and form some of them have been overlooked. We have much pleasure in again directing attention to them, knowing that all true flower-lovers will find themselves rewarded in cultivating these fine old favorites.

AUSTRIAN BRIAR ROSE (Rosa lutea). Yellow Roses.

Single Yellow. Large deep golden yellow flowers. Single Red. Bright scarlet. Harrisonii. Double rich yellow.

Persian Yellow. Semi-double, rich yellow.

MICROPHYLLA (Rosa microphylla). Double white. EGLANTINE (Rosa rubiginosa). The true English Sweetbriar. Delicate pink, single.

BANKSIAN ROSES (Rosa Banksia). Double.

White Banksia. White flowers, in clusters, very double. Yellow Banksia. Deep yellow, double.

Strong, well-established plants, 50c. each. \$5 per doz.

SELECTION OF ROSES .- We will be happy to make selections of suitable varieties for any specified purpose either for forcing, bedding, planting out, etc. A long experience gives us that invaluable knowledge necessary to the proper selection of varieties.

Standard or Tree Roses.

HESE Roses, as a rule, do not succeed so well in America as in Europe, where no well-appointed garden is complete without a collection of them. But years of experience have shown us that if treated in the manner prescribed below they will thrive well, forming handsome trees and giving little trouble. (1) They should be budded or grafted upon Briar stock, not upon R. CANINA or Dog Rose. (2) The Briar stocks when planted should have good, fibrous roots, with no suckers starting from them, and if these should appear at any time they must be promptly removed. (3) Plant the Rose Trees in good, loamy soil, stake them well, and wrap the entire stem about an inch thick with rye straw, tying on the wrap ing with willows. (4) During very dry, hot weather syringe the Roses often, preferably every evening after sundown. This will keep the *tems moist, which is very essential. (5) After the first few light frosts the stems should be bent over into as nearly a horizontal position as may be, and covered with pine boughs, straw mats, or anything that will shade them from the sun.

It is better to plant Standard Roses in a regular Rose bed or border, where the ground is kept constantly tilled and clean, and where suckers may be readily detected. Dwarf Roses can then be planted between and beneath the Standards, giving splendid effects. Once well established, they must be well fed both with bone dust and stable manure. The manure should be spread over the beds in autumn, just before the Rose Trees are bent over for winter protection, as it helps to protect the roots in winter. Thus treated, Standard Roses succeed admirably and grow into beautiful forms, giving much pleasure to their owners.

We keep in stock a choice selection of the best varieties only, all of which are two and three years old, from bud or graft. Trees of best quality, \$1.50 each, \$15 per dozen.

bud or graft. Trees of best quality, \$1.50 each, \$15 per dozen.

Aquatic Plants.

LANTS which grow in or near the water are receiving much attention, and they are well worthy of it, for some of the most beautiful of all our flowers are aquatic in their nature. The exquisite Water Lilies, the stately Lotus, the wonderful Victoria regia, serve with others to distinguish this class. It is not at all difficult, in reality, to provide for them the necessary conditions. In a modest way, the hardy Water Lilies can be enjoyed growing in an ordinary tub, with a minimum of attention; or a brick tank of any desired dimensions, in which all the fine aquatics will flourish, can be readily constructed and lined with cement. If contiguous to a greenhouse, so that a section of the tank can be warmed by a hot water or steam pipe, the great Victoria regia can be flowered. In any case the tub or tank must be so constructed as to afford several depths of water for the plants—some needing shallow and others deeper water. We will construct and arrange aquatic tanks anywhere desired.

OUTDOOR AQUATIC TANKS.

It should be noted that all those Marsh Plants or Aquatics which are hardy can be left out in the basins or tanks, covered with leaves and litter, which preserves the plants as well as the tank or basin, in which no water should be left during winter. All those which are not hardy can be kept over winter in small tubs, in the green-house under the stages, or in some similar place where not much room is wasted with them, and they can be kept at a temperature—bove freezing. The tank for Aquatics can be sunk in the lawn in a sunny position, or on the south side of a building or fence. Provide means for emptying the tank from the bottom, and a waste pipe near the top for over-flow, so that fresh water can be run in occasionally to prevent stagnation. Such a tank needs to be well protected from severe frost in winter. Aquatics may also be grown in the basins of fountains, but they will not flourish if the spray is allowed to fall upon the leaves. Water enough to keep that in the basin fresh may be allowed to run in, but no more, as this would lower the temperature too much.

The best soil for growing all kinds of aquatic plants is rich loam, mixed with decayed stable or cow manure, in equal quantities, with the addition of about one pound of bone meal to a wheelbarrow load of the compost. Leaf mold or fine black peat can no doubt always be used to advantage. Rich mud from the bed of a pond or sluggish stream will answer in place of the loam, but is not essential. The compost should be well mixed, placed in the tank, and covered with about an inch of good, clean sand to keep the manure from rising; then let in the water several days before putting in the plants. Nelumbiums must be grown in heavy loam or clay, well enriched. They will not flourish in sand or sandy peat.

We furnish collections of Hardy Aquatics in twelve and twenty-five varieties at from \$5 to \$9 per dozen.

Hardy Ornamental Trees and Plants.

We call especial attention to our stock of hardy ornamental trees, shrubs and plants, which consists only of the choicer and more select varieties of the various classes suitable for permanent outdoor decorations. Those marked with a star (*) are staple varieties, and of these we carry an unlimited stock, of which we can supply large quantities at specially low rates. Everything that follows is entirely hardy, during our ordinary winters, as far north as Canada. Some of the species are also grown as greenhouse plants, but are hardy with slight protection; all such are specifically mentioned.

Hardy Perennial and Herbaceous Plants.

HARDY CLIMBING VINES.

Estimates furnished on application.

The graceful drapery so effective in the decoration of lawns, gardens, porches and verandas, giving to them a cozy and home-like, as well as an elegant air, is furnished chiefly by hardy climbing vines. Tender or annual climbers, however great their beauty, because they lack permanency, will never be so popular for this purpose. The Clematises, of which we have a large and fine collection, Honeysuckles, Wistarias and Ampelopsis, are especially beautiful and well-prized for such work.

CLEMATIS.

The Clematises are, perhaps, the most popular and valuable of our hardy climbers. They are perfectly hardy and very easy to cultivate, requiring only a good, rich soil, and some attention in pruning and training. They bloom from May to October, producing during that period an abundance of flowers of all shades of color. We offer a specially fine list of tested varieties.

Office of Rose Hill Nurseries, showing Clematis paniculata in bloom, and other vines.

Albert Victor. Rich lavender, deep purple through the center.

Alexandra. Pale reddish violet; an effective variety. Beauty of Worcester. Flowers of a lovely bluish violet shade; pure white stamens.

Coccinea. Scarlet flowers; very pretty. 50 cts.

Countess of Lovelace. Bluish lilac; rosette shape;

a charming double form.

Crispa. Lilac purple flowers. 50 cts.

Davidiana. Blue.

Duchess of Edinburgh. One of the best double whites.

whites.

Duke of Edinburgh. Flowers large, rich violet-purple.

Flammula. The Virgin's Bower. White flowers. 25 cts.

Fremontii, Purple. 30 cts.

Gipsy Queen. Rich velvety purple.

Integrifolia. An erect species, with very fragrant, solitary, nodding blue flowers. 25 cts.

Lackmanni. Flowers of an integer purple.

Jackmanni. Flowers of an intense purple.

Jackmanni alba, A pure white. 50 cts. to \$1.

Lady Boville. Grayish blue.

Lady Caroline Neville. White.

Lanuginosa Nivea. Pure white and very large. Lord Londesborough. Deep mauve; fine large flowers.

Lady Londesborough. Silver-gray, pale bar. Miss Bateman. A pretty white variety, with chocolate anthers. 75 cts.

Mrs. George Jackmann. Satiny white, with creamy bar.

Pallassii, An erect kind, White. 30 cts.

Paniculata. We supply strong plants, that will grow from 8 to 10 feet high and flower the next season, at 50 cts. each, \$5 per doz.; small plants, 15 to 25 cts. each.

Pierotti, A new species from Japan, very similar to C. montana. 25 cts.

Prince of Wales. Deep puce-purple.

Pitcherii. Pitcher's Leather Flower. Deep purplish brown or nearly black flowers in summer. 25 cts.

Purpurea Elegans Flowers large, of a de p violetnurple.

purple.

Recta. Upright Virgin's Bower. An erect species, with small white flowers. 25 cts.

Rubra Violacea. Maroon, shaded violet.

Rubella. Rich claret-purple, in the way of Jackmanni. Sir Garnet Wolseley. Slaty blue ground color. 75 cts. Standishii. Light mauve purple. 75 cts. Stans. An erect species. White flowers. 25 cts. Stella. Light violet, with a distinct bar of deep, red-Star of India. Reddish plum, with red bars.

Tubulosa, A showy, erect species. Dark purple flowers.

25 cts.

Tunbridgensis. Deep bluish purple. Velutina purpurea. Blackish mulberry.

Viorna. A climbing species, with bell-shaped reddish purple flowers. 25 cts.

Virginiana, Virgin's Bower. Climbs 5 to 15 feet. This fine native climber is rare in cultivation. 25 cts. Vitalba. Traveler's Joy.

Viticella, Bluish purple, 25 cts.

Price, except where noted, 75 cts. each, \$8 per doz.; our selection, 50 cts. each, \$5 per doz.

HARDY ORNAMENTAL GRASSES.

Including Plants of Grass-like Habit, Suitable for Outdoor Planting.

The Grasses seem most beautiful when mingled with other decorative plants. They are all essentially graceful in habit, and will be of service in taking away the stiffness and formality of groups of many otherwise handsome plants. Many of the species are of much value for winter decorations in a dried form, in which condition they preserve a great share of their beauty. All those marked with a star (*) are somewhat tender, and should be lifted and placed in a cold frame or cellar during winter.

SUCCULENT PLANTS.

Including Agaves, Aloes, Echeverias, Euphorbias, Mesembryanthemums, Rocheas, Sansevieras, Sedums, Sempervivums and Cactuses.

C UCCULENT plants are useful in many situations, both indoors and in the garden or on the lawns. SUCCULENT plants are useful in many situations, both indoors and in the garden or on the lawns. They are especially available for rockeries, and lend themselves to outdoor bedding in sunny places in a most distinct and effective way. Nearly all of the Agaves and many of the Aloes, and others of the robust habit, make handsome ornamental plants on lawns, or for decorating entrances, balconies, etc., affording a most admirable contrast to the tropical foliage plants, while the extreme beauty and regularity of "carpet" or "ribbon" beds wrought out with Echeverias as the principal factor is well-known. Many of the Cactuses and Mesembryanthemums are noted for their brilliant and beautiful flowers, of great range of color and form, and often richly fragrant; while the strange and wonderful shapes and habits of the Euphorbias, Stapelias and Crassulas win for them much admiration.

This class of plants is rapidly returning to public favor, and has the great merit of requiring a minimum of care and attention from the planter. We keep in stock all select ornamental forms of succulent plants, and furnish a descriptive price list to all who ask for it.

Select Collection of Cactuses.

The order Cactacæa includes many separate genera of succulent plants—Cereus, Echinocactus, Echinocereus-Epiphyllum, Mammillaria, Phyllocactus, Pilocereus, Rhipsalis, etc. The different types and varieties are wonder, fully varied and curious, and the majority are very ornamental. The prices for Cactuses vary from 25 cents to \$1.00, according to size and variety. We furnish prices, together with a descriptive list, upon application.

We will select twelve distinct varieties, including the best species, for \$3.00, \$5.00 and \$10.00, according to size and varieties. To those desiring to form collections of greater extent, we will be pleased to supply lists of the best species, with prices. Cactuses for bedding will be supplied, also, at very moderate prices, by the dozen or hypothesis. hundred.

DECIDUOUS TREES AND SHRUBS.

A General List, containing a Careful Selection of the best Ornamental Trees and Shrubs.

No pleasure grounds or rural homes, however modest, are considered complete without ornamental trees and shrubs of a hardy and permanent character. Too often the effect of planting is measurably destroyed by the use of inferior or unsuitable species. Where grounds of any extent are to be planted, the advice of a competent land-scape gardener will be found fully worth its cost. Trees and shrubs of an ornamental character, properly selected and suitably planted, increase very largely the actual value of any property, and add much to the comfort and pleasure of those who occupy the premises.

| In making proper selections from this imports | nt department for any place and delication |

In making proper selections from this important department for any place or any desired effect, our long experience is most valuable. We will be glad, on application, to make suggestions of varieties for any location, such as will be most ornamental and effective. We will also supply superior collections when desired, of any extent. Simply state the amount to be expended and the location and surroundings; we will send

NEW DOUBLE FLOWERING LILAC.

VICTOR LEMOINE, bearing grand trusses of double flowers of a true lilac color, price \$3.00. We are working up a very fine stock of this class of plants and hope to be able to offer several other varieties in the autumn.

Evergreen Trees and Shrubs.

Evergreens are indispensable in all fine landscape effects. Aside from the fact that they give the only attainable coloring to garden or lawn in winter, they are, when judiciously used, very ornamental in all situations. The varied hues of the foliage give an opportunity for many fine decorative effects. For hedges or windbreaks, nothing can equal the Evergreens of quick growth. In addition to the Conifers, there are in this section many other fine plants with persistent evergreen foliage.

Our list is select, including only the finest sorts, which are of assured value for ornamental and utilitarian planting. All that are not perfectly hardy in this climate are specifically mentioned.

Large and full grown trees of Maples, Elms, Oaks, Lindens, Beech, Birch, Tulip, Sycamore, Locust Horse-chestnut, Ash, various Evergreens, etc., suitable for producing immediate effect as shade and lime trees, which have been often transplanted and are in the best possible condition, are furnished at lowest market prices.

Morall shrubs and trees herein mentioned will be furnished in large quantities at specially low rates, and we earnestly request those having charge of the planting in parks, large grounds, cemeteries, etc., to correspond for anything they may require.

QUAINT JAPANESE NANINIZED TREES

Of great age and character. Perfectly hardy in this climate.

Pinus Pumilio (Mughus).

Retinospora obtusa nana.

We have a very fine stock of these really wonderfully trained and dwarfed trees, which are collected for us in Japan from private gardens. The prices for these vary from \$5.00 to \$50 each, as much as \$300 having been paid for some of these trees.

We have thirty-five varieties, a list of which can be had on application.

Also Japanese Dwarf Double Flowering CHERRIES and PEACHES. Price, \$2.50 to \$5.00.

Select Fruit Trees and Plants.

Including Choice Varieties for Ordinary Garden and Field Culture, Grape Vines for Forcing, and a Select Assortment of Tropical Fruits.

We offer in this department a very careful selection of Fruits for all purposes, including in addition to Grape Vines for hot and cold vineries a brief list of such Tropical Fruits as may readily be grown in a greenhouse or in our southern states. The selection of ordinary domestic fruits is the cream from the innumerable list of varieties now offered, often so confusing to the intending purchaser; we include here no mere duplications under new names, but only the best and most distinct of each class.

HARDY FRUIT TREES.

APPLES. 25 to 75 cts. each, \$2.50 to \$6 per doz., according to size and sorts.

HARDY GRAPE VINES. Of the very many varieties, now in cultivation, we offer only a short list of the very best, such as we know from personal experience are the most satisfactory, in a large portion of the country.

Varieties. Concord (black, medium), Catawba (reddish, late), Delaware (deep amber, early), Hartford Prolific (black, early), Iona (deep red, late), Rogers' Hybrids, Ives' Seedling (black, very early), Martha (white, early), Moore's Early (black, very early), Prentiss (light green, late), Pocklington (light green, medium), Brighton (light red, late), Niagara (golden yellow, medium). Two and three-year old vines of the above, 50 to 75 cts. each, \$5 to \$7.50 per doz. Special prices for large quantities given on application.

FOREIGN GRAPE VINES.

For Hot and Cold Graperies

We make a specialty of Grape Vines for Vineries, and supply fine and healthy two-year-old plants, guaranteed free from disease, of the best selected sorts.

Black Barbarossa. Berries round, very large; a very late sort; best suited for hot vinery. \$2.

Black Frontignan. Berries below medium size, flesh rich and juicy; a very reliable sort. \$2.

Black Hamburg. Berries roundish oval, very large, juicy and rich; the most popular and most reliable sort in cultivation. \$2.

Black Prince. Berries roundish oval, juicy and rich bunches long and tapering; best for cold vineries. \$2.

Black St. Peter. Black. Very fine dark variety, good free grower; best for hot vinery. \$2.

Canon Hall Muscat. Berries very large, roundish oval; juicy and rich; best for hot vinery. \$2.

- Calabrian Raisin. Berries large, round and juicy; a first-class white grape; late. \$2.
- Chasselas de Fontainebleau. Berries round and large, very juicy and sweet; a good sort for cold vinery. \$2.
- Duchess of Buccleugh. Berries round and golden; good bearer; a very excellent grape. \$2.
- Golden Queen (Pearson's White). Bunch large and well shouldered; berries large, oblong; said to be the best late keeping white grape in cultivation; of strong and vigorous habit. \$2.
- Gros Colman. Berries round and extra large, of peculiar flavor; very large bunches of vigorous habit; a very handsome grape. \$2.
- Gros Maroc. Berries large, ovate, dark plum color; flesh firm and juicy: bunches medium, and set freely. \$2.
- Lady Downes' Seedling. Black. Large and handsome berries, above medium size; bunch medium, long, tapering, always well set; flesh firm, sweet and richly flavored; a good keeper, and one of the best late sorts. \$2.
- Mrs. Pince (Black Muscat). Bunch large and tapering, well shouldered and handsome; berries medium and oval; flesh firm, rich and sweet, with true Muscat flavor; a late grape, and an excellent keeper; best for hot vinery. \$2.
- Muscat Hamburg or Black Muscat. Berries very large, roundish oval; flesh melting, juicy and rich; a most delicious grape, with a distinct Muscat flavor; a valuable mid-season variety; best suited for hot vinery. \$2.
- Muscat of Alexandria. Greenish yellow, golden when fully ripened. Bunches large and shouldered, long-tapered; berries large and oval; flesh firm, rich and sugary, with a delicious Muscat flavor; very prolific, and requires high temperature; a very valuable and well-known grape, ripening late; best for hot vinery. \$2.

- Madresfield Court. Black Muscat. Bunch large and well shouldered; berries large, oblong, with a fine delicate bloom; flesh melting, juicy and rich, with strong Muscat flavor; a valuable variety, of robust habit. \$2.
- Prince Albert. Berries large, in a fine bunch; rich, juicy and highly flavored; a very fine grape, and best suited for hot vinery. \$2.
- Royal Muscadine. Berries round, of a pale amber when ripe; flesh firm, juicy and very pleasant; a very good grape of the Sweetwater type, sometimes called White Chasselas; suitable for cold vinery. \$2.
- Royal Ascot. Bunches large; berries firm, jet black and very juicy, with a piquant plum-like flavor; best for hot graperies. \$2.
- Santa Cruz. White; large berries, large bunch; a vigorous grower, and a very good sort. \$2.
- Trentham Black. Berries oval, large, very juicy and rich; a great bearer and a very good sort; best for cold vinery. \$2.
- White Frontignan. Bunch medium; berries round and thickly set, flesh rich and juicy, of a distinct Muscat flavor; an excellent mid-season variety; best for hot vinery. \$2.
- White Nice. Large bunch, good cropper, and a free growing sort; very sweet and juicy; ripens late; best for hot vinery. \$2.
- White Tokay. Bunch large, compact and well shouldered; berries large and ovate; flesh tender, rich and juicy, of a rich flavor; good keeper and vigorous grower; a well-known and valuable grape; best for hot vinery. \$2
- White Sweetwater. Bunch medium; a well-known variety. \$2.
- variety, \$2.

 White Syrian. Berries oval, good size; bunches very large; best for hot vinery. \$2.
- Wilmot's Hamburg. Berries jet black, much like the old and popular Black Hamburg; of a very agreeable and spicy flavor. \$2.

One-year-old vines of the above varieties may be had at prices one-third less than for two-year-old.

Special prices for large quantities will be given on application. All our vines are guaranteed true to name and variety.

Collections of Tropical Plants.

We will send twelve plants, all distinct, our selection, for \$10; or twenty-five plants, our selection, for \$17.50.

Collections of Tropical and Semi-Tropical Fruits.

Suitable for Greenhouse Culture in the North, or for the Open air in the South.

Fruits from the tropics are very interesting, and often most novel and delicious in taste. Those here named may be grown and made to bear in the greenhouse, or in some of our southern states and parts of California—in fact, in any locality where the winter temperature does not fall below 45 degrees. They should all have good culture in rich soil, and during their growing season be supplied with plenty of moisture; after their growth is made, less moisture will cause them to ripen their wood, and often to bloom and set fruit.

Those having private conservatories will find these fruits an endless source of pleasure and enjoyment if carefully grown.

SIEBRECHT & SON'S PATENT GREENHOUSE SHADING.

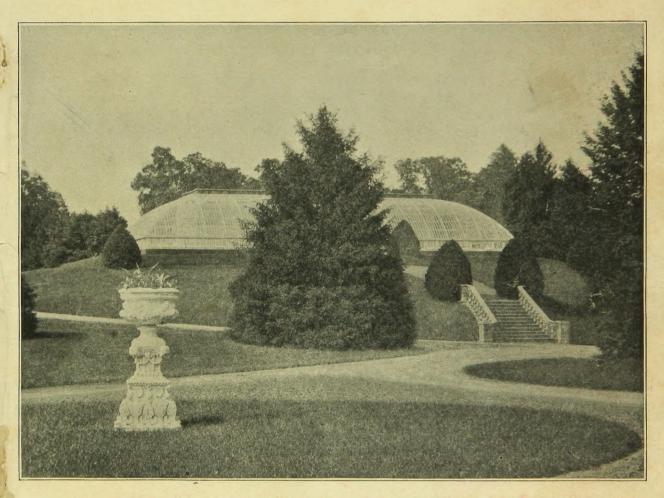

Siebrecht & Son's Patent Greenhouse Shading.

The most satisfactory shading ever used; never gets out of order; lasts as long as a good greenhouse.

How it is Made and Operated .- The shading is made of slats, which are of the best clear wood; it is arranged in sections, either 61% or 8 feet wide, but can be made of any width and length to suit size of roof. These slats are fastened together very substantially with galvanized wire bands and rings. The chain-like fastenings are from 16 to 18 inches apart, each section of shading having a roller attached to the lower end, the other end being fastened to the ridge of the house or highest point to be shaded, and where, by means of a pulley and line, it is easily rolled up and down at whatever distance desired. It can be operated inside or outside of the house. It will protect your glass from hail storms, and your plants from the intense heat in summer, and from severe cold in winter; does not get out of order; does not destroy paint, putty or glass, as is the case with the old-fashioned method of white-wash or paint. It gives your house an even and cooling shade, and a neat appearance. It can be rolled up and down at will, which is a great advantage, especially when the short, dark days come, and only a little shading is needed. Estimates given on application.

LANDSCAPE ARCHITECTURE.

With a quarter century's experience, we offer our services for all Landscape and Planting Work, of whatever magnitude. We will send competent and expert Landscape Architects, upon application, to inspect either new or old places, with a view to planting or remodeling. This work will be undertaken by contract or otherwise, and estimates will be cheerfully furnished for any desired work, upon visit or receipt of specifications.

It is our custom to fully guarantee our planting for one year, and we replace, free of charge, any trees or plants which may fail to grow within that time, unless they have been damaged by carelessness in handling after having been turned over to the owners in good condition. This guarantee gives the customer the fullest legitimate protection, and insures the planting of strong and healthy stock.

Many country residence places may be wonderfully improved at a very moderate expense by the intelligent efforts of our Landscape experts; and in new planting, our wide experience and great resources serve to save much expense and bother to our patrons, as we can include the planning, stock and planting under one contract and one responsibility.

N. B.—Competent gardeners are nearly always at our command for the care of such places, and we can usually supply or recommend men suitable for any position.
